

Energy policy at Moni MG Ltd.

The energy policy of "Moni MG" Ltd. is oriented towards energy savings and improvement of energy characteristics, thereby providing a contribution to the implementation of the national indicative goals for energy saving, reducing the carbon footprint and mitigating the harmful impact on the climate.

Moni MG Ltd. follows a strategy for sustainable development, corresponding to the best indicators of competing companies in terms of efficiency and competitiveness.

Moni MG Ltd. is committed to increasing the company's competitiveness by continuously improving its energy performance.

The company's senior management sets the following energy management priorities and goals, which provide the framework for setting and reviewing general and specific energy goals:

- ◆ Improvement of existing and implementation of new energy-efficient machines and equipment, technologies and materials;
- ◆ Increasing production efficiency through optimal use of installed energy capacities, equipment and networks;
- ◆ Rational use of secondary energy resources;
- ◆ Reduction of non-production losses of raw materials and energy.

To achieve the set goals, Moni MG Ltd. declares the following **responsibilities**:

- ◆ To implement successful practices in the purchase of energy services, products, machinery, equipment and energy used in production, which lead to the improvement of energy performance;
- ◆ To ensure compliance of energy management with the applicable legal and other requirements related to the use and consumption of energy, as well as the energy efficiency of the organization;
- ◆ To apply and implement new technologies, new machines, equipment, materials, processes and services that ensure continuous improvement of energy characteristics, efficient use of energy resources, environmental protection and reduction of the carbon footprint of the economy;
- ◆ To implement energy-saving measures with proven effectiveness to improve production processes and reduce the consumption of energy resources for the production of a unit of production;
- ◆ To provide access to information and the necessary resources to achieve general and specific energy goals;
- ◆ To provide conditions for increasing the knowledge of the energy management team and the motivation of the staff in the implementation of activities and commitments, contributing to the achievement of the energy policy and increasing the energy efficiency of the enterprise;

MONI MG

The aspiration of the management at "Moni MG" Ltd. is to create conditions for the accessibility of the energy policy and maximum inclusion of interested parties and the public.

Moni MG Ltd. fulfills these commitments by:

- ◆ Continuous improvement in energy management in accordance with the conditions of the environment in which the company operates;
- ◆ Appropriately selected qualified and experienced staff, motivated for development and improvement of the energy management system;
- ◆ Establishing and removing deviations from the requirements (laws, regulations, etc.) and the reasons for their occurrence, with the aim of their prevention;
- ◆ Ensuring controlled and constantly improving conditions leading to continuous improvement of energy characteristics and production indicators;
- ◆ Support for the purchase of energy-efficient products and services that have an impact on energy performance;
- ◆ Support for design activities to improve energy performance;
- ◆ Active communication with interested parties, with the aim of realizing the importance of their personal responsibility for ensuring efficient use of energy;
- ◆ Effective monitoring and control of the manufactured products along the entire chain and for the entire life cycle of the product;
- ◆ Provision of the necessary resources to fulfill the declared goals.
